Welcome to our 2022 Transparency report

A message from our Territory Senior Partner

We are pleased to present our Transparency Report for 2021/22, which shows how we maintain quality in our audit work. We have prepared this Transparency Report, in respect of the financial year ended 30 June 2022, in accordance with the requirements of Article 13 of the EU Regulation No. 537/2014. The report describes our policies, systems and processes for ensuring quality and the way we foster a culture of quality at every level of the firm. It details some of the companies we performed audits for and the total revenue from our audit and non-audit work.

The audit profession continues to face challenges as the expectations that society places on us change fast due to big trends like demographic shifts, technological advances, instant flow of information and many others. We understand the need to adapt to changes and set high quality standards for all client engagements and all types of services we deliver.

While PwC is a multidisciplinary firm, our 2022 Transparency report gives you information about our systems of quality control over audits and how the firm is governed. It also describes our policies and processes. This report is primarily focused on our audit practice and related services and included in the report is an update from Arna G. Tryggvadóttir, who leads our audit practice.

Ljósbrá Baldursdóttir
Territory Senior Partner and CEO

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 152 countries with more than 327,000 people who are committed to delivering quality in assurance, advisory and tax services. We are committed to driving a strong culture of quality and excellence that is core to our purpose.

PwC's approach to building trust is designed to meet rising expectations of transparency, accountability and stakeholder engagement. It also recognises the importance of quality - and that reporting and compliance represent just one link in a chain that includes organisational culture, executive mindset, aligned standards, certified professionals, stringent controls, tailored technologies and appropriate governance.

Similar to building trust, delivering sustained outcomes requires us to work in an integrated way. Instead of taking a traditional technology-driven approach to transformation, PwC focuses on the outcomes that our efforts are seeking to achieve.

In June 2021, we unveiled The New Equation, PwC's landmark global strategy which responds to fundamental changes in the world, including technological disruption, climate change, fractured geopolitics, and the effects of the COVID-19 pandemic. The New Equation is based on analysis of global trends and thousands of conversations with clients and stakeholders. It builds on more than a decade of sustained revenue growth and continued investment. The New Equation focuses on two interconnected needs that clients face in the coming years. The first is to build trust, which has never been more important, nor more difficult. The second is to deliver sustained outcomes in an environment where competition and the risk of disruption are more intense than ever and societal expectations have never been greater.

As part of The New Equation strategy the PwC network is making an incremental US \$3bn investment in quality. This includes a \$1bn investment in a multi-year programme to deliver a new audit ecosystem - human-led, tech-powered and data-driven. It will enable us to make continuous improvements to audit quality by further standardising, simplifying, centralising and automating our audit work, transforming the experience for our clients and our people.

For more information on The New Equation, please see <https://www.pwc.com/gx/en/>

A message from our Assurance Leader

With the New Equation, our Assurance strategy continues to focus on four key pillars - our people, quality, growth and transformation.

We are working towards a future that is human-led and tech-powered. It is as important as ever that we attract and retain our top talent and that we utilise the technology available to us to work efficiently and effectively. I am always conscious that we remain current and it is imperative that we maintain quality and embrace new technology, whilst also looking to realise the benefits for all of our stakeholders.

In the current environment, trust has never been more important. We need to earn trust with our clients, stakeholders and the people that work within our organisation. It's something you earn through every interaction, every experience and every relationship.

The last two years of the pandemic have presented challenges that we have proactively worked to overcome; - my hope is that we are able to continue to deliver quality assurance solutions for our clients whilst maintaining a dynamic work environment for our talented workforce.

We are pleased to present our Transparency Report for 2022, which shows how we maintain quality in our audit work. The report describes our policies, systems and processes for ensuring quality, the results of key quality monitoring programs and reviews, and the way we foster a culture of quality at every level of our firm.

PwC network

Global network

PwC is the brand under which the member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide professional services. Together, these firms form the PwC network. 'PwC' is often used to refer either to individual firms within the PwC network or to several or all of them collectively.

In many parts of the world, accounting firms are required by law to be locally owned and independent. The PwC network is not a global partnership, a single firm, or a multinational corporation. The PwC network consists of firms which are separate legal entities.

PricewaterhouseCoopers International Limited

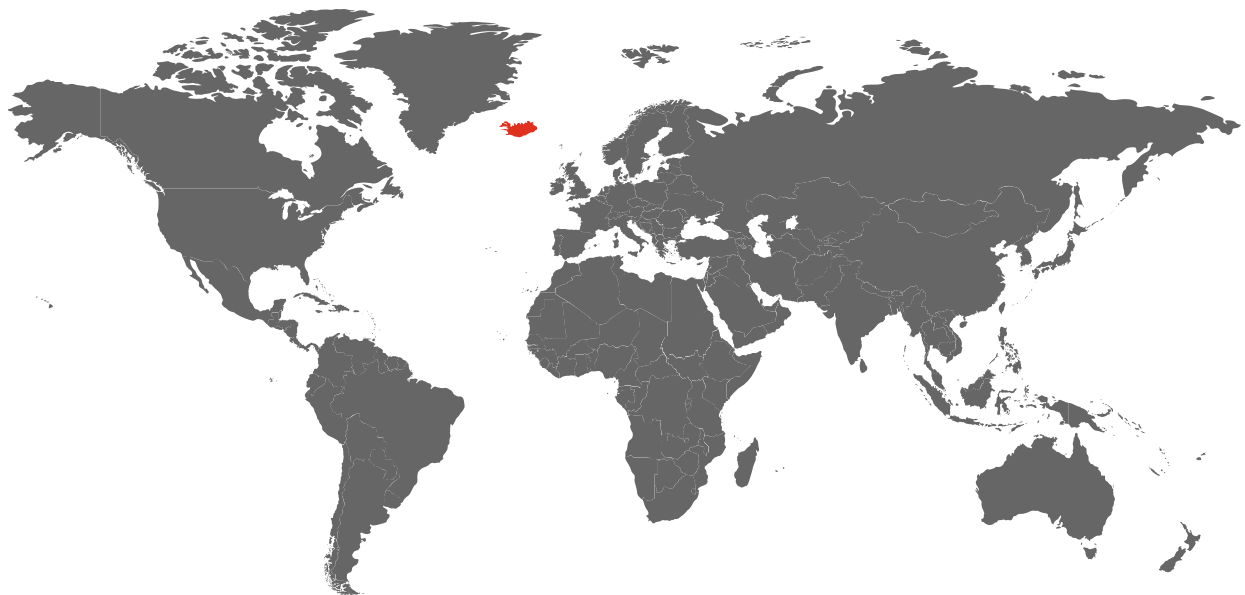

Firms in the PwC network are members in, or have other connections to PwCIL, an English private company limited by guarantee. PwCIL does not practise accountancy or provide services to clients. Rather its purpose is to act as a coordinating entity for member firms in the PwC network. Focusing on key areas such as strategy, brand, and risk and quality, PwCIL coordinates the development and implementation of policies and initiatives to achieve a common and coordinated approach amongst individual member firms where appropriate. Member firms of PwCIL can use the PwC name and draw on the resources and methodologies of the PwC network. In addition, member firms may draw upon the resources of other member firms and/or secure the provision of professional services by other member firms and/or other entities. In return, member firms are bound to abide by certain common policies and to maintain the standards of the PwC network as put forward by PwCIL.

The PwC network is not one international partnership. A member firm cannot act as agent of PwCIL or any other member firm, cannot obligate PwCIL or any other member firm, and is liable only for its own acts or omissions and not those of PwCIL or any other member firm. Similarly, PwCIL cannot act as an agent of any member firm, cannot obligate any member firm, and is liable only for its own acts or omissions. PwCIL has no right or ability to control member firm's exercise of professional judgement.

The governance bodies of PwCIL are:

- **Global Board**, which is responsible for the governance of PwCIL, the oversight of the Network Leadership Team and the approval of network standards. The Board does not have an external role. The Board is comprised of 20 members. Two are appointed as external, independent directors, and the other 18 Board members are elected by partners from PwC firms around the world every four years.
- **Network Leadership Team**, which is responsible for setting the overall strategy for the PwC network and the standards to which the PwC firms agree to adhere.
- **Strategy Council**, which is made up of the leaders of the largest PwC firms and regions of the network, agrees on the strategic direction of the network and facilitates alignment for the execution of strategy.
- **Global Leadership Team**, which is appointed by and reports to the Network Leadership Team and the Chairman of the PwC network. Its members are responsible for leading teams drawn from member firms to coordinate activities across all areas of our business.

The Managing Director of PwC Iceland is a member of the Strategy Council and maintains our relationships with the Network Leadership Team.

Our approach to quality

Definition and culture

At PwC, we define quality service as one that consistently meets the expectations of our stakeholders and which complies with all applicable standards and policies. An important part of delivering against this quality definition is building a culture across a network of 327,000 people that emphasises that quality is the responsibility of everyone including our 116 people. Continuing to enhance this culture of quality is a significant area of focus for our global and local leadership teams and one which plays a key part in the measurement of their performance.

Measurement and transparency

For all our businesses, each PwC firm – as part of the agreement by which they are members of the PwC network – is required to have in place a comprehensive system of quality management (SoQM); to annually complete a SoQM performance assessment; and to communicate the results of these assessments to global leadership. These results are then discussed in detail with the leadership of each local firm and if they are not at the level expected, a remediation plan is agreed with local leadership taking personal responsibility for its successful implementation.

As our services change and develop, and the needs and expectations of our stakeholders also change, we are continually reviewing and updating the scale, scope and operations of our system of quality management and investing in programmes to enhance the quality of the services that we provide.

Our purpose and values are the foundation of our success. Our purpose is to build trust in society and solve important problems, and our values help us deliver on that purpose. Our purpose reflects 'why' we do what we do, and our strategy provides us with the 'what' we do. 'How' we deliver our purpose and strategy is driven by our culture, values and behaviours. This forms the foundation of our system of quality management and permeates how we operate, including guiding our leadership actions, and how we build trust in how we do business, with each other and in our communities.

When working with our clients and our colleagues to build trust in society and solve important problems, we:

- Act with integrity
- Make a difference
- Care
- Work together
- Reimagine the possible

Key messages are communicated to our firm by our Senior Partner and our leadership team and are reinforced by engagement partners. These communications focus on what we do well and actions we can take to make enhancements. We track whether our people believe that our leaders' messaging conveys the importance of quality to success of our firm. Based on this tracking, we are confident our people understand our audit quality objectives.

Delivering service of the highest quality is core to our purpose and our assurance strategy, the focus of which is to strengthen trust and transparency in our clients, in the capital markets and wider society.

Specific focus on audit quality

The quality of our work is at the heart of the PwC network and we invest significant and increasing resources in the continuous enhancement of quality across our network. This includes having a strong quality infrastructure supported by the right people, underlying tools and technology at both the network level and within our firm, and a continuous programme of innovation and investment in our technology. The PwC Network's Global Assurance Quality (GAQ) organisation aims to support member firms in promoting, enabling, and continuously improving Assurance quality through effective policies, tools, guidance and systems used to further promote and monitor quality and to build an appropriate level of consistency in what we do.

Each firm is responsible for utilising the resources provided by the network as part of our efforts to deliver quality to meet the expectations of our stakeholders.

The QMSE framework

To deliver services in an effective and efficient manner that meets the expectations of our clients and other stakeholders, the PwC network has established the Quality Management for Service Excellence (QMSE) framework for quality management which integrates quality management into business processes and the firm-wide risk management process.

This framework introduces an overall quality objective that is supported by a series of underlying quality management objectives and our system of quality management (SoQM) must be designed and operated so that these objectives are achieved with reasonable assurance.

Specific focus on audit quality

Delivering quality audits is core to our purpose. To that end, we are committed to providing a quality audit. However, where our work falls below the standards that we set for ourselves and are set by the regulators, we are disappointed and also rightly criticised. We take each of these instances very seriously and work hard to learn lessons and to enhance the quality of audits that we undertake in the future.

The right objectives and capabilities

To help us put this strategy into effect, the PwC network has established clear objectives around audit quality and provides support to help us meet these objectives. Our engagement teams can only deliver quality audit services if they have access to the necessary capabilities – both in terms of people and technology. That's why our quality objectives focus on having the right capabilities – both at a member firm level and across our network – and on using these capabilities to meet our own standards and the professional requirements. These capabilities can only be developed under the right leadership and quality culture, promoting the right values and behaviours.

Integrated and aligned in the right way

The quality objectives focus on having the right people supported by effective methodologies, processes, and technology appropriately directed and supervised. These represent the capabilities that we believe are relevant to achieving and sustaining audit quality. To help us achieve these objectives, there are a number of dedicated functions at a network level that develop practical tools, guidance and systems to support and monitor audit quality across our network. These elements have been integrated and aligned by our network to create a comprehensive, holistic and interconnected quality management framework that we tailor to reflect our individual circumstances.

Delivering a quality end-product consistently

Central to the framework is the recognition that quality management is not a separate concept; it needs to be embedded in everything we do as individuals, teams, firms and the network. The quality objectives are supported by designated key activities which are considered necessary to achieve the quality objectives, focused mainly on building a quality infrastructure and organisation. We supplement and design those key activities as appropriate to respond to risks we have identified to achieve each quality objective.

Values and judgements

Performing quality audits requires more than just the right processes. At its core, an auditor's role is to assess with a "reasonable" degree of assurance whether the financial statements prepared by the company's management are free of "material misstatements" – reaching a professional judgement on whether the financial statements present a fair picture of the company's financial performance and position. To carry out this assessment effectively, the auditor needs to use all the capabilities that have been built up in line with our quality objectives. These include applying ethical behaviour in accordance with PwC's values, professional scepticism, specialist skills and judgement – all supported by technology.

Navigating the impact of external factors on our system of quality management

The past several years have seen unprecedented challenges. From the global COVID-19 pandemic to the Russian government's invasion of Ukraine (hereafter referred to as 'the war in Ukraine'), these events are first and foremost human tragedies. Our SoQM reflects our response to these events and changing risks based on impacts to our client, our people and the way we operate, including new or revised policies and procedures in our firm that have been implemented or are under consideration at any given point in time. Under the QMSE framework, our SoQM is designed and operated to consider changes in facts and circumstances resulting in:

- New or changing quality risks to achieving one or more of the quality objectives
- Changes to the risk assessment of existing quality risks
- Changes to the design of the firm's SoQM, including the risk responses

The QMSE framework has helped us navigate the changes in our firm's environment, by assessing the completeness and effectiveness of our responses including any additional monitoring to be put in place, and identifying any gaps to address new or emerging quality risks.

Sharing developments and experience COVID-19

From the early stages of the pandemic, the PwC network put a team in place to monitor developments globally and to highlight areas of critical importance to ensure we did not compromise on audit quality and more than two years into the pandemic, we have maintained our focus on those areas impacting our clients, our people and how we work. We have leveraged the guidance developed by our network to provide sustained, consistent leadership and guidance on audit quality and equip our teams to consider their client's unique circumstances and respond accordingly.

The COVID-19 pandemic resulted in us facing a number of new challenges in our audits. This ranged from how we operate as a team to plan and complete the audit, to how we interact with our clients to obtain the necessary audit evidence and execute specific audit procedures such as completing physical inventory counts.

Our network's response to the war in Ukraine including separation of PwC Russia and Belarus and our approach to sanctions

Following the Russian government's invasion of Ukraine, the PwC network's main focus continues to be doing all we can to help our colleagues and support the humanitarian efforts to aid the people of Ukraine.

The PwC network's response to the war in Ukraine resulted in several actions including the decision that, under the circumstances, PwC should not have member firms in Russia and Belarus and consequently PwC Russia and PwC Belarus have exited the network.

In addition, the PwC network is exiting work for Russian entities and individuals subject to sanctions. Any sanction on Russian entities or individuals that is passed anywhere in the world will be applied everywhere in the PwC Network. As of June 2022, our firm has no working relationship with Russian entities and individuals subject to sanctions. The PwC network will also not undertake any work for the Russian Federal Government or State-owned Enterprises and is also conducting reviews to identify engagements with non-sanctioned Russian clients and considering the appropriateness of any ongoing relationship.

Our network's response to the conflict including the separation of PwC Russia and PwC Belarus and approach to sanctions, as well as consideration of the broader risks that impact our clients are being factored into our firm's SoQM through the identification of potential quality risks that have or may arise. Our firm is monitoring the actions we have and will take to address the identified risks to assess whether further changes are needed to our firm's SoQM or how we perform our engagements and interact with our clients.

Cultures and values

Our purpose and values are the foundation of our success. Our purpose is to build trust in society and solve important problems, and our values help us deliver on that purpose. Our purpose reflects 'why' we do what we do, and our strategy provides us with the 'what' we do. 'How' we deliver our purpose and strategy is driven by our culture, values and behaviours. This forms the foundation of our system of quality management and permeates how we operate, including guiding our leadership actions, and how we build trust in how we do business, with each other and in our communities.

When working with our clients and our colleagues to build trust in society and solve important problems, we:

- Act with integrity
- Make a difference
- Care
- Work together
- Reimagine the possible

Key messages are communicated to our firm by our Senior Partner and our leadership team and are reinforced by engagement partners. These communications focus on what we do well and actions we can take to make enhancements. We track whether our people believe that our leaders' messaging conveys the importance of quality to the success of our firm. Based on this tracking, we are confident our people understand our audit quality objectives.

Delivering service of the highest quality is core to our purpose and our assurance strategy, the focus of which is to strengthen trust and transparency in our clients, in the capital markets and wider society.

As mentioned previously, to help PwC Iceland put this strategy into effect, the PwC network has established the QMSE framework which introduces an overall quality objective for the Assurance practise that is supported by a series of underlying quality management objectives. Our system of quality management (SoQM) must be designed and operated so that these objectives are achieved with reasonable assurance. The achievement of these objectives is supported by a **quality management process** established by our firm and Assurance leadership, business process owners, and partners and staff.

Partner and staff survey

64%

of our staff and partners participated in our Global Pulse Survey.

92%

of the respondents believe their leaders encourage them to deliver quality services

The Quality Management Process

This quality management process includes:

- identifying risks to achieving the quality objectives
- designing and implementing responses to the assessed quality risks
- monitoring the design and operating effectiveness of the policies and procedures through the use of process-integrated monitoring activities such as real-time assurance as well as appropriate Assurance quality indicators
- continuously improving the system of quality management when areas for improvement are identified by performing root cause analyses and implementing remedial actions and
- establishing a quality-related recognition and accountability framework to be used in appraisals, remuneration, and career progression decisions

This involves the integrated use of Assurance Quality Indicators to aim to **predict** quality issues, Real Time Assurance to aim to **prevent** quality issues, Root Cause Analysis to **learn** from quality issues and a Recognition and Accountability Framework to **reinforce** quality behaviours, culture and actions.

These programs, by design, require ongoing monitoring and continuous improvement, in particular Assurance Quality Indicators, which we expect will evolve significantly over time and as we continue to use and learn from these measures.

Aim to Predict: Assurance Quality Indicators

We have identified a set of Assurance Quality Indicators (AQIs) that support our Assurance leadership team in the early identification of potential risks to quality, using metrics to aim to predict quality issues. This quality risk analysis is an essential part of our QMSE, and the AQIs, in addition to other performance measures, also provide a key tool in the ongoing monitoring and continuous improvement of our SoQM.

AQIs and other performance measures are prepared and used by the respective QMSE objective owners and Assurance Leadership to provide ongoing information supplementing other information at hand to predict potential quality issues. Important information for leadership regarding quality matters is also obtained through independent assessments in the form of quality inspections of engagements and the evaluation of the SoQM.

Aim to Prevent: Real Time Assurance

We have developed a Real Time Quality Assurance (RTA) program designed to provide preventative monitoring that helps coach and support engagement teams get the 'right work' completed in real-time, during the audit.

Our key elements of the RTA program are:

- Reviews of on-going audit engagements (hot reviews) by experienced practice professionals, including additional coaching to engagement teams and identification of shareable practices where relevant.
 - Larger clients/PIE clients are selected based on a number of risk factors, with use of a comprehensive checklist similar to the Engagement Compliance Review (ECR) checklist (refer to the monitoring section).
 - For the smaller client segment hot reviews are targeted based on quality initiatives and the firm focus areas using an ECR checklist.
- Use of RTA Dashboard, which is based on automated analysis of our large population of audit engagement databases to target specific focus areas or engagements for support.

Learn: Root cause analysis

We perform analyses to identify potential factors contributing to our firm's audit quality so that we can take actions to continuously improve. Our primary objectives when conducting such analyses are to understand what our findings tell us about our SoQM and to identify how our firm can provide the best possible environment for our engagement teams to deliver a quality audit. We look at quality findings from all sources including our own ongoing monitoring of our SoQM as well as Network inspection of our SoQM—whether identified through our own internal inspections process or through external inspections and other inputs such as our Global People Survey and financial statement restatements and accounting errors—to help identify possible distinctions and learning opportunities.

For individual audits, an objective team of reviewers identifies potential factors contributing to the overall quality of the audit. We consider factors relevant to technical knowledge, supervision and review, professional scepticism, engagement resources, and training, amongst others. Potential causal factors are identified by evaluating engagement information, performing interviews, and reviewing selected audit working papers to understand the factors that may have contributed to audit quality. In addition, the data compiled for audits both with and without deficiencies is compared and contrasted to identify whether certain factors appear to correlate to audit quality.

Our goal is to understand how quality audits may differ from those with deficiencies, and to use these learnings to continuously improve all of our audits. We evaluate the results of these analyses to identify enhancements that may be useful to implement across the practice. We believe these analyses contribute significantly to the continuing effectiveness of our quality controls.

Reinforce: Recognition and Accountability Framework

Our Recognition and Accountability Framework (RAF) reinforces quality in everything our people do in delivering on our strategy, with a focus on the provision of services to our clients, how we work with our people and driving a high quality culture. It holds Partners accountable for quality behaviours and quality outcomes. Our RAF considers and addresses the following key elements:

- **Quality outcomes:** We provide transparent quality outcomes to measure the achievement of the quality objectives. Our quality outcomes take into account meeting professional standards and the PwC network and our firm's standards and policies
- **Behaviours:** We have set expectations of the right behaviours that support the right attitude to quality, the right tone from the top and a strong engagement with the quality objective
- **Interventions/recognition:** We have put in place interventions and recognition that promotes and reinforces positive behaviours and drives a culture of quality
- **Consequences/reward:** We have implemented financial and non-financial consequences and rewards that are commensurate to outcome and behaviour and sufficient to incentivise the right behaviours to achieve the quality objectives

Risk Management Partner, Quality Review Partner and Partner Responsible for Independence provide input to leadership regarding application of accountability for engagement leaders. For partners, the deductions can be made from yearly remuneration. For non-partners, deductions can be made from their annual bonus, where applicable.

Ethics, independence and objectivity

Ethics

At PwC, we adhere to the fundamental principles of ethics set out in the International Ethics Standards Board for Accountants (IESBA) Code of Ethics for Professional Accountants (the Code), which are:

- i. **Integrity** – to be straightforward and honest in all professional and business relationships.
- ii. **Objectivity** – to not allow bias, conflict of interest or undue influence of others to override professional or business judgements.
- iii. **Professional Competence and Due Care** – to maintain professional knowledge and skill at the level required to ensure that a client or employer receives competent professional service based on current developments in practice, legislation and techniques and act diligently and in accordance with applicable technical and professional standards.
- iv. **Confidentiality** – to respect the confidentiality of information acquired as a result of professional and business relationships and, therefore, not disclose any such information to third parties without proper and specific authority, unless there is a legal or professional right or duty to disclose, nor use the information for the personal advantage of the professional accountant or third parties.
- v. **Professional Behaviour** – to comply with relevant laws and regulations and avoid any action that discredits the profession.

Our network standards applicable to all network firms cover a variety of areas including ethics and business conduct, independence, anti-money laundering, anti-trust/fair-competition, anti-corruption, information protection, firm's and partner's taxes, sanctions laws, internal audit and insider trading. We take compliance with these ethical requirements seriously and strive to embrace the spirit and not just the letter of those requirements. All partners and staff undertake annual mandatory training, as well as submitting annual compliance confirmations, as part of the system to support appropriate understanding of the ethical requirements under which we operate. Partners and staff uphold and comply with the standards developed by the PwC network and leadership in PwC Iceland monitors compliance with these obligations.

In addition to the PwC Values (Act with Integrity, Make a difference, Care, Work together, Reimagine the possible) and PwC Purpose, PwC Iceland has adopted the PwC network standards which include a Code of Conduct, and related policies that clearly describe the behaviours expected of our partners and other professionals-behaviours that will enable us to build public trust. Because of the wide variety of situations that our professionals may face, our standards provide guidance under a broad range of circumstances, but all with a common goal-to do the right thing.

Upon hiring or admittance, all staff and partners of PwC Iceland are provided with the PwC Global Code of Conduct. They are expected to live by the values expressed in the Code in the course of their professional careers at our firm and have a responsibility to report and express concerns, and to do so fairly, honestly, and professionally when dealing with a difficult situation or when observing conduct inconsistent with the Code. Each firm in the PwC network provides a mechanism to report issues. There is also a confidential global reporting option on [pwc.com/codeofconduct](https://www.pwc.com/codeofconduct). PwC Iceland has adopted an accountability framework to facilitate remediation of behaviours that are inconsistent with the Code of Conduct.

The PwC Code of Conduct is available on-line for all internal and external stakeholders at <https://www.pwc.com/ethics>.

Finally, the Organisation for Economic Co-operation and Development (OECD) provides guidance, including the OECD Guidelines for Multinational Enterprises (the OECD Guidelines), by way of non-binding principles and standards for responsible business conduct when operating globally. The OECD Guidelines provide a valuable framework for setting applicable compliance requirements and standards. Although the PwC network consists of firms that are separate legal entities which do not form a multinational corporation or enterprise, PwC's network standards and policies are informed by and meet the goals and objectives of the OECD Guidelines.

Objectivity and Independence

As auditors of financial statements and providers of other types of professional services, PwC member firms and their partners and staff are expected to comply with the fundamental principles of objectivity, integrity and professional behaviour. In relation to assurance clients, independence underpins these requirements. Compliance with these principles is fundamental to serving the capital markets and our clients.

The PwC Global Independence Policy, which is based on the Code, including International Independence Standards, contains minimum standards with which PwC member firms have agreed to comply, including processes that are to be followed to maintain independence from clients, when necessary.

PwC Iceland has a designated partner (known as the 'Partner Responsible for Independence' or 'PRI') with appropriate seniority and standing, who is responsible for implementation of the PwC Global Independence Policy including managing the related independence processes and providing support to the business. The partner is supported by a team of independence specialists. The PRI reports directly to Territory Senior Partner.

Independence policies and practices

The PwC Global Independence Policy covers, among others, the following areas:

- personal and firm independence, including policies and guidance on the holding of financial interests and other financial arrangements, e.g., bank accounts and loans by partners, staff, the firm and its pension schemes;
- non-audit services and fee arrangements. The policy is supported by Statements of Permitted Services (SOPS), which provide practical guidance on the application of the policy in respect of non-audit services to audit clients and related entities;
- business relationships, including policies and guidance on joint business relationships (such as joint ventures and joint marketing) and on purchasing of goods and services acquired in the normal course of business; and
- acceptance of new audit and assurance clients, and the subsequent acceptance of any non-assurance services to be provided to those clients.

In addition, there is a Network Risk Management Policy governing the independence requirements related to the rotation of key audit partners.

These policies and processes are designed to help PwC comply with relevant professional and regulatory standards of independence that apply to the provision of assurance services. Policies and supporting guidance are reviewed and revised when changes arise such as updates to laws and regulations, including any changes to the Code or in response to operational matters.

PwC Iceland supplements the PwC network Independence Policy as required by local laws and regulations such as the Icelandic Act on Auditors and Auditing no. 94/2019, where they are more restrictive than the network's policy.

Independence-related systems and tools

As a member of the PwC network, PwC Iceland has access to a number of systems and tools which support PwC member firms and their personnel in executing and complying with our independence policies and procedures. These include:

- The Central Entity Service (CES), which contains information about corporate entities including all PwC audit clients and their related entities (including all public interest audit clients and SEC restricted entities) as well as their related securities. CES assists in determining the independence restriction status of clients of the member firm and those of other PwC member firms before entering into a new non-audit service or business relationship. This system also feeds Independence Checkpoint and Authorisation for Services;
- 'Independence Checkpoint' which facilitates the pre-clearance of publicly traded securities by all partners and practice managers before acquisition and is used to record their subsequent purchases and disposals. Where a PwC member firm wins a new audit client, this system automatically informs those holding securities in that client of the requirement to sell the security where required;
- Authorisation for Services (AFS) which is a global system that facilitates communication between a non-audit services engagement leader and the audit engagement leader, regarding a proposed non-audit service, documenting the analysis of any potential independence threats created by the service and proposed safeguards, where deemed necessary, and acts as a record of the audit partner's conclusion on the permissibility of the service; and

- Global Breaches Reporting System which is designed to be used to report any breaches of external auditor independence regulations (e.g., those set by regulation or professional requirements) where the breach has cross-border implications (e.g., where a breach occurs in one territory which affects an audit relationship in another territory). All breaches reported are evaluated and addressed in line with the Code.

PwC Iceland also has a rotation tracking process which monitors compliance with independence audit rotation policies for PwC Iceland engagement leaders and other key audit partners involved in an audit.

Independence training and confirmations

PwC Iceland provides all partners and staff with annual or on-going training in independence matters. Training typically focuses on milestone training relevant to a change in position or role, changes in policy or external regulation and, as relevant, provision of services. This training is usually computer-based. Additionally, face-to-face training is delivered to members of the practise on an as-needed basis by independence specialists.

All partners and practice staff are required to complete an annual compliance confirmation, whereby they confirm their compliance with relevant aspects of the member firm's independence policy, including their own personal independence. In addition, all partners confirm that all non-audit services and business relationships for which they are responsible comply with policy and that the required processes have been followed in accepting these engagements and relationships. These annual confirmations are supplemented by periodic and ad-hoc engagement level confirmations for PIE-clients.

Independence monitoring and disciplinary policy

PwC Iceland is responsible for monitoring the effectiveness of its quality control system in managing compliance with independence requirements. In addition to the confirmations described above, as part of this monitoring, we perform:

- Compliance testing of independence controls and processes;
- Personal independence compliance testing of a random selection of, at a minimum, partners and practice managers as a means of monitoring compliance with independence policies; and
- An annual assessment of the member firm's adherence with the PwC network's standard relating to independence.

The results of monitoring and testing are reported to the firm's management annually.

PwC Iceland has disciplinary policies and mechanisms in place that promote compliance with independence policies and processes, and that require any breaches of independence requirements to be reported and addressed.

This would include discussion with the client's audit committee regarding the nature of a breach, an evaluation of the impact of the breach on the independence of the member firm and the engagement team and the need for actions or safeguards to maintain objectivity. Although most breaches are minor and attributable to an oversight, all breaches are taken seriously and investigated as appropriate. The investigations of any identified breaches of independence policies also serve to identify the need for improvements in PwC Iceland's systems and processes and for additional guidance and training.

Considerations in undertaking the audit

Our principles for determining whether to accept a new client or continue serving an existing client are fundamental to delivering quality, which we believe goes hand-in-hand with our purpose to build trust in society. We have established policies and procedures for the acceptance of client relationships and audit engagements that consider whether we are competent to perform the engagement and have the necessary capabilities including time and resources, can comply with relevant ethical requirements, including independence, and have appropriately considered the integrity of the client. We reassess these considerations in determining whether we should continue with the client engagement and have in place policies and procedures related to withdrawing from an engagement or a client relationship when necessary.

Client and Engagement Acceptance and Continuance

PwC Iceland has a process in place to identify acceptable clients based on the PwC network's proprietary decision support systems for audit client acceptance and retention (called Acceptance and Continuance). Acceptance facilitates a determination by the engagement team, business management and risk management specialists of whether the risks related to an existing client or a potential client are manageable, and whether or not PwC should be associated with the particular client and its management. More specifically, this system enables:

Engagement teams:

- To document their consideration of matters required by professional standards related to acceptance and continuance;
- To identify and document issues or risk factors and their resolution, for example through consultation by adjusting the resource plan or audit approach or putting in place other safeguards to mitigate identified risks or by declining to perform the engagement; and
- To facilitate the evaluation of the risks associated with accepting or continuing with a client and engagement.

Member firms (including member firm leadership and risk management):

- To facilitate the evaluation of the risks associated with accepting or continuing with clients and engagements;
- To provide an overview of the risks associated with accepting or continuing with clients and engagements across the client portfolio; and
- To understand the methodology, basis and minimum considerations all other member firms in the network have applied in assessing audit acceptance and continuance.

Our people

[Message from leadership](#)

[PwC network](#)

[Our approach to quality](#)

[Cultures and values](#)

[Our approach](#)

[Monitoring](#)

[Legal and governance structure](#)

Our people

People strategy

Our people strategy was developed in support of our broader business strategy, The New Equation. We aim to both attract and retain a community of solvers, an agile and adapt workforce to solve important problems and deliver sustained outcomes. We are focused on being the world's leading developer of talent and enabling our people with greater agility and confidence in a rapidly changing world. Specific focus areas include creating a resilient foundation for times of change through supporting the well-being of our people and enabling effective delivery; developing inclusive leaders for a shifting world; and enabling our workforce for today's realities and tomorrow's possibilities.

Our goal is to hire candidates who have diverse backgrounds and appropriate skills; have a questioning mindset and intellectual curiosity; and demonstrate courage and integrity.

Core to PwCs national strategy is our people, together with our clients and the wider society. Our employees are key to our success. We are committed to upholding our values, our partners and leaders continue to be great role models, we continuously seek to improve our role as an employer, we are creating Iceland's best arena for professional development and we work actively.

Diversity and inclusion

At PwC, we're committed to creating a culture of belonging. We are focused on ensuring our ways of working embrace diversity and fostering an inclusive environment in which our people are comfortable bringing their whole selves to work and feel that they belong and can reach their full potential. As demonstrated through our core values of Care and Work Together, we strive to more deeply understand and empathise with different backgrounds, perspectives and experiences. We know that when people from different backgrounds and with different points of view work together, we create the most value for our clients, our people, and society.

Recruitment

PwC Iceland aims to recruit, train, develop and retain the best and the brightest staff who share in the firm's strong sense of responsibility for delivering high-quality services. Our hiring standards include a structured interview process with behaviour-based questions built from The PwC Professional framework, assessment of academic records, and background checks. Across the firm in FY22, we recruited over 25 new people, most of them being university graduates.

Team selection, experience and supervision

Our audit engagements are staffed based on expertise, capabilities and years of experience. Engagement leaders determine the extent of direction, supervision and review of junior staff.

Feedback and continuous development

Our team members obtain feedback on their overall performance, including factors related to audit quality, such as technical knowledge, auditing skills and professional scepticism. Audit quality is an important factor in performance evaluation and career progression decisions for both our partners and staff. Feedback on performance and progression is collected via our Snapshot tool, a simple, mobile-enabled technology. We also use Workday to give and receive upward and peer feedback. Ongoing feedback conversations help our people grow and learn faster, adapt to new and complex environments, and bring the best to our clients and firm.

Career progression

PwC Iceland uses The PwC Professional, our global career progression framework, which sets out clear expectations at all staff levels across five key dimensions. The framework underpins all elements of career development and helps our people develop into well-rounded professionals and leaders with the capabilities and confidence to produce high-quality work, deliver an efficient and effective experience for our clients, execute our strategy, and support our brand. Our annual performance cycle is supported by continuous feedback conversations and regular check-ins with the individual's Team Leader to discuss their development, progression and performance

Retention

Turnover in the public accounting profession is often high because as accounting standards and regulations change, accountants are in demand and the development experience we provide makes our staff highly sought after in the external market. Our voluntary turnover rate fluctuates based on many factors, including the overall market demand for talent.

Global People Survey

Each PwC member firm participates in an annual Global People Survey, administered across the network to all of our partners and staff. PwC Iceland is responsible for analysing and communicating results locally, along with clearly defined actions to address feedback.

The PwC Professional

The PwC Professional supports the development and career progression of our staff by providing a single set of expectations across all lines of service, geographies, and roles; outlining the capabilities needed to thrive as purpose-led and values-driven leaders at every level.

Professional Development

We are committed to putting the right people in the right place at the right time. Throughout our people's careers, they are presented with career development opportunities, and on-demand learning, and on-the-job real time coaching/development. Our flexible training portfolio facilitates personalised learning with access to a variety of educational materials including webcasts, podcasts, articles, videos, and courses.

Achieving a professional credential supports our Firm's commitment to quality through consistent examination and certification standards. Our goal is to provide our staff with a more individualised path to promotion and support them in prioritising and managing their time more effectively when preparing professional exams. Providing our people with the ability to meet their professional and personal commitments is a critical component of our people experience and retention strategy.

Continuing education

We, and other PwC member firms, are committed to delivering quality assurance services around the world. To maximise consistency in the Network the formal curriculum, developed at the Network level, provides access to training materials covering the PwC audit approach and tools-this includes updates on auditing standards and their implications, as well as areas of audit risk and areas of focus for quality improvement.

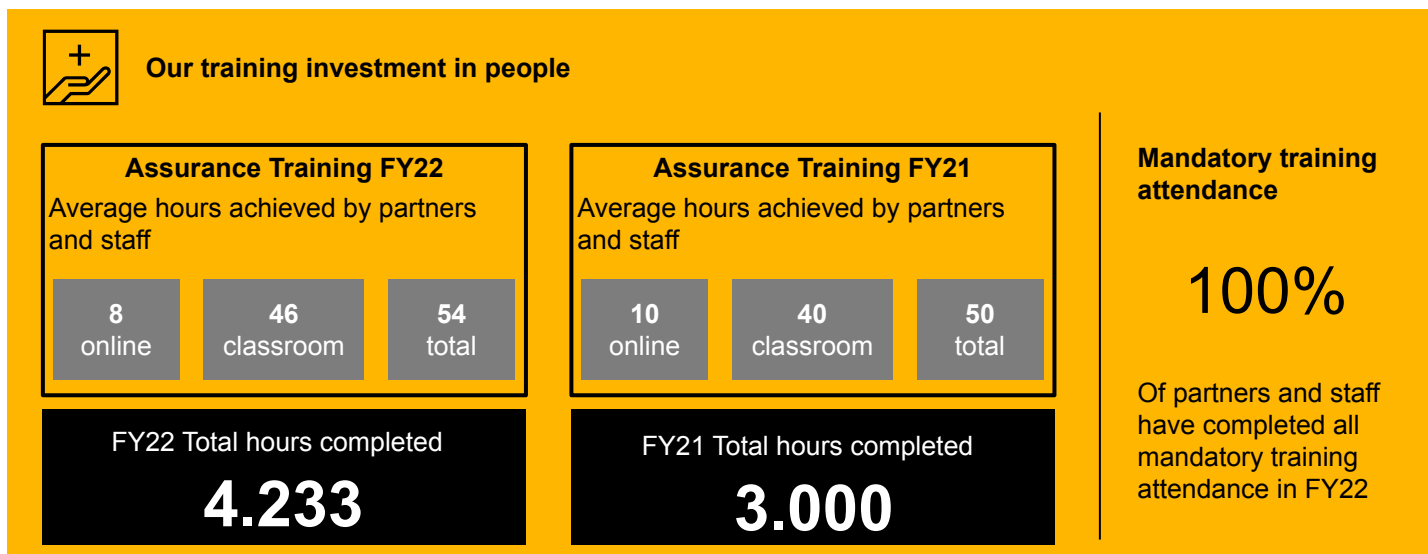

This formal learning is delivered using a blend of delivery approaches, which include remote access, classroom learning, virtual classroom, and on-the-job support. The curriculum supports our primary training objective of audit quality, while providing practitioners with the opportunity to strengthen their technical and professional skills, including professional judgement while applying a sceptical mindset.

The design of the curriculum allows us to select, based on local needs, when we will deliver the training. Our Learning & Education leader then considers what additional training is appropriate – formal and/or informal – to address any additional specific local needs.

These considerations result in a training curriculum for the audit practice which is approved by Assurance leadership. It contains both basic training for auditors as well as advanced training for experienced employees (i.e., authorized public accountants, managers and partners) in order to support continuous professional development and the legal requirements to retain the title as authorized public accountants. Technical training includes audit, digital skills, IFRS, laws & regulations, ethics and independence, etc.

There is also a training plan for the firm as a whole, including mandatory training for new hires and annual R&Q and independence update training.

Completion of mandatory training is monitored and reported to leadership to ensure that all relevant staff obtain the minimum relevant professional development.

Our approach

[Message from leadership](#)

[PwC network](#)

[Our approach to quality](#)

[Cultures and values](#)

[Our people](#)

[Monitoring](#)

[Legal and governance structure](#)

Our audit approach

The quality and effectiveness of audit is critical to all of our stakeholders. We therefore invest heavily in the effectiveness of our audits, in the skills of our people, in our underlying methodology, the technology we use, and in making the right amount of time and resources available.

We pay close attention to the internal indicators and processes that routinely monitor the effectiveness of our risk and quality processes, and provide timely information about the quality of our audit work and any areas for improvement. Details of these indicators and processes can be found in the Monitoring of Assurance quality section. Additionally, we consider what our various stakeholders require from us, what they tell us we need to improve and the findings of regulatory inspections on the quality of our work.

Tools and technologies to support our audit

Our tools

As a member of the PwC network, PwC Iceland has access to and uses PwC Audit, a common audit methodology and process. This methodology is based on the International Standards on Auditing (ISAs), with additional PwC policy and guidance provided where appropriate. PwC Audit policies and procedures are designed to facilitate audits conducted in compliance with all ISA requirements that are relevant to each individual audit engagement. Our common audit methodology provides the framework to enable PwC member firms to consistently comply in all respects with applicable professional standards, regulations and legal requirements.

Our technology

- **Aura**
our global audit documentation platform is used across the PwC network. Aura helps drive how we build and execute our audit plans by supporting teams in applying our methodology effectively, by creating transparent linkage between risks, required procedures, controls and the work performed to address those risks, as well as providing comprehensive guidance and project management capabilities. Targeted audit plans specify risk levels, controls reliance and substantive testing. Real time dashboards show teams audit progress and the impact of scoping decisions more quickly.
- **Connect**
is our collaborative platform that allows clients to quickly and securely share audit documents and deliverables. Connect also eases the burden of tracking the status of deliverables and resolving issues by automatically flagging and tracking outstanding items and issues identified through the audit for more immediate attention and resolution. Clients are also able to see audit adjustments, control deficiencies, and statutory audit progress for all locations- in real time.
- **Connect Audit Manager**
streamlines, standardises and automates group and component teams coordination for multi-location and statutory/regulatory audits. It provides a single digital platform to see all outbound and inbound work and digitises the entire coordination process which facilitates greater transparency, compliance and quality for complex multi-location audits.
- **Halo**
our data auditing tools, test large volumes of data, analysing whole populations to improve risk assessment, analysis and testing. For example, Halo for Journals enables the identification of relevant journals based on defined criteria making it easier for engagement teams to explore and visualise the data to identify client journal entries to analyse and start the testing process.
- **Count**
which facilitates the end-to-end process for inventory counts, allows our engagement teams to create and manage count procedures, counters to record results directly onto their mobile device or tablet and engagement teams to export final results into Aura.
- **PwC's Confirmation System**
which facilitates an automated and standardised end-to-end process for all types of external confirmations, allows our engagement teams to create requests and receive external confirmation in a secure environment that helps mitigate the risks associated with receiving confirmation responses electronically.

As part of The New Equation investment, we will be rolling out a continuous stream of new capabilities through our existing platforms to increasingly simplify, standardise, centralise and automate our audit work.

Reliability and auditability of audit technologies

Our firm has designed and implemented processes and controls to underpin the reliability of these audit technologies. This includes clarification of the roles and responsibilities of audit technology owners and users. In addition, we have guidance focused on the sufficiency of audit documentation included in the workpapers related to the use of these audit technologies, including consideration of the reliability of the solution, and the documentation needed to assist the reviewer in meeting their supervision and review responsibilities as part of the normal course of the audit.

Confidentiality and information security

Confidentiality and information security are key elements of our professional responsibilities. Misuse or loss of confidential client information or personal data may expose the firm to legal proceedings, and it may also adversely impact our reputation. We take the protection of confidential and personal data very seriously.

Our focus on our clients requires a holistic and collaborative approach to reducing security, privacy and confidentiality risks with significant investment in appropriate controls and monitoring to embed an effective three lines of defence model. This model has enabled us to strengthen our information security organisation, align to industry good practice and improve our internal control frameworks.

Data Privacy

The firm maintains a robust and consistent approach to the management of all personal data, with everyone in our organisation having a role to play in safeguarding personal data. We have continued to build on our extensive GDPR readiness programme, and are committed to embedding good data management practices across our business.

Information Security

Information security is a high priority for the PwC network. Member firms are accountable to their people, clients, suppliers, and other stakeholders to protect information that is entrusted to them.

The PwC Information Security Policy (ISP) is aligned with ISO/IEC 27001, financial services industry standards, and other reputable frameworks (COBIT, NIST, etc.) as benchmarks for security effectiveness across the network of member firms. The PwC ISP directly supports the firm's strategic direction of cyber readiness to proactively safeguard its assets and client information. The PwC ISP is reviewed, at a minimum, on an annual basis.

PwC Iceland is required to adhere to the ISP requirements and complete a quarterly, data-driven assessment to demonstrate compliance. The Member Firm is assessed against the required controls through analysis of available data. In coordination with Member Firm stakeholders, the data is reviewed for quality to ensure an accurate assessment of the Member Firm's security posture. Deviations that result from the ISP Compliance Programme assessment process are prioritised for remediation utilising a risk based approach and per timelines agreed with leadership.

Supporting engagement performance

Evolving delivery model

We continue to evolve the way we deliver our services so our people give our clients an even better experience, further enhance the quality of what we do and create economic capacity to invest in the future. We use delivery centres to streamline, standardise, automate, and centralise portions of the audit.

Direction, coaching and supervision

Engagement leaders and senior engagement team members are responsible and accountable for providing quality coaching throughout the audit and supervising the work completed by junior members of the team, coach the team and maintain audit quality. Engagement teams utilise Aura which has capabilities to effectively monitor the progress of the engagement to determine that all work has been completed and reviewed by appropriate individuals, including the engagement leader.

Consultation culture

Consultation is key to maintaining high audit quality. We have formal protocols about mandatory consultation, in the pursuit of quality. For example, our engagement teams consult with appropriate groups in areas such as taxation, risk, valuation, actuarial and other specialities as well as individuals within our National Technical function

National Technical function

Our National Office comprises technical accounting, auditing, and financial reporting groups as well as risk and quality. These specialists play a vital role in keeping our policies and guidance in these areas current by tracking new developments in accounting and auditing and providing those updates to professional staff.

Quality Review Partners (QRP)

Specific audit engagements are assigned a QRP as part of the member firm's system of quality management as required by professional standards. These partners, who have the necessary experience and technical knowledge, are involved in the most critical aspects of the audit. For example, they may advise on matters of firm independence, significant risks and a team's responses to those risks, and specific accounting, auditing, and financial reporting and disclosure issues.

Differences of opinion

Protocols exist to resolve the situations where a difference of opinion arises between the engagement leader and either the QRP, another Assurance partner or central functions such as the National Technical function. These include the use of technical panels consisting of partners independent of the engagement.

Monitoring

Monitoring of Assurance quality

We recognise that quality in the Assurance services we deliver to clients is key to maintaining the confidence of investors and other stakeholders in the integrity of our work. It is a key element to our Assurance strategy.

Responsibility for appropriate quality management lies with the Leadership of PwC Iceland. This includes the design and operation of an effective System of Quality Management (SoQM) that is responsive to our specific risks to delivering quality audit engagements, using the network's QMSE framework.

The overall quality objective under the QMSE framework is to have the necessary capabilities in our firm and to deploy our people to consistently use our methodologies, processes and technology in the delivery of Assurance services in an effective and efficient manner to fulfil the valid expectations of our clients and other stakeholders.

Our firm's monitoring procedures include an ongoing assessment aimed at evaluating whether the policies and procedures which constitute our SoQM are designed appropriately and operating effectively to provide reasonable assurance that our audit, non-audit assurance and related services engagements are performed in compliance with laws, regulations and professional standards.

Our monitoring also encompasses a review of completed engagements (Engagement Compliance Reviews - ECR) as well as periodic monitoring of our SoQM by an objective team within our firm. The results of these procedures, together with our ongoing monitoring, form the basis for the continuous improvement of our SoQM.

Our firm's monitoring programme is based on a consistent network-wide inspections programme for Assurance based on professional standards relating to quality control, including ISQC 1, as well as network policies, procedures, tools and guidance.

In addition to PwC Iceland's monitoring of audit quality, the firm is subject to regulatory quality inspections performed by the Iceland Certified Public Accountants and Auditing Oversight Board (Endurskoðendaráð) at least every three years. The latest inspection covering the quality system was performed during September-October 2018. There were no material findings. The latest inspection covering audit engagements was performed in the autumn 2019. No material findings regarding audit quality were noted but few observations were made. We have reviewed these matters and considered them as deemed applicable to strengthen our audit quality.

ECRs are risk-focused reviews of completed engagements covering, on a periodic basis, individuals in our firm who are authorised to sign audit, non-audit assurance or related services reports. The review assesses whether an engagement was performed in compliance with PwC Audit guidance, applicable professional standards and other applicable engagement-related policies and procedures. Each signer is reviewed at least once every second year, unless a more frequent review is required based on the profile of that signer's client engagements or due to local regulatory requirements.

Reviews are led by experienced Assurance partners, supported by objective teams of partners, directors, senior managers and other specialists. ECR reviewers may be sourced from other member firms if needed to provide appropriate expertise or objectivity. Review teams receive training to support them in fulfilling their responsibilities, and utilise a range of checklists and tools developed at the network level when conducting their inspection procedures. The network inspection team supports review teams by monitoring the consistent application of guidance on classification of engagement findings and engagement assessments across the network.

Additionally, the PwC network undertakes periodic reviews to evaluate certain elements of member firms' systems of quality management. We also look at the member firm leadership's own assessment of the effectiveness of their system of quality management and their determination of whether the overall quality objective has been achieved.

The results of all inspections are reported to our firm's leadership who are responsible for analysing the results of the inspections along with the findings identified from all sources of information and implementing remedial actions as necessary. In situations where adverse quality matters on engagements are identified, based on the nature and circumstances of the issues, the responsible partner or our firm's Assurance leadership personnel may be subject to additional mentoring, training or further sanctions in accordance with our firm's Recognition and Accountability Framework.

Partners and employees of our firm are informed about the inspection results and the actions taken to enable them to draw the necessary conclusions for the performance of their engagements. In addition, engagement partners of our firm are informed by the network inspection program about relevant inspection findings in other PwC member firms, which enables our partners to consider these findings in planning and performing their audit work.

PricewaterhouseCoopers ehf. (PwC Iceland) is a private limited liability company owned, indirectly through a partnership, by its Icelandic partners. At PwC, we work to build trust in society and help solve important problems. We do so based on our knowledge of audit, tax and advisory services. It is crucial to the development of our business that we have the right processes and governing bodies that engage in active dialogue. At PwC Iceland, we have a Board of Directors and a management board supervised by the Territory Senior Partner (CEO). Read more about our organisation, governance structure and processes in this section.

Legal structure and ownership

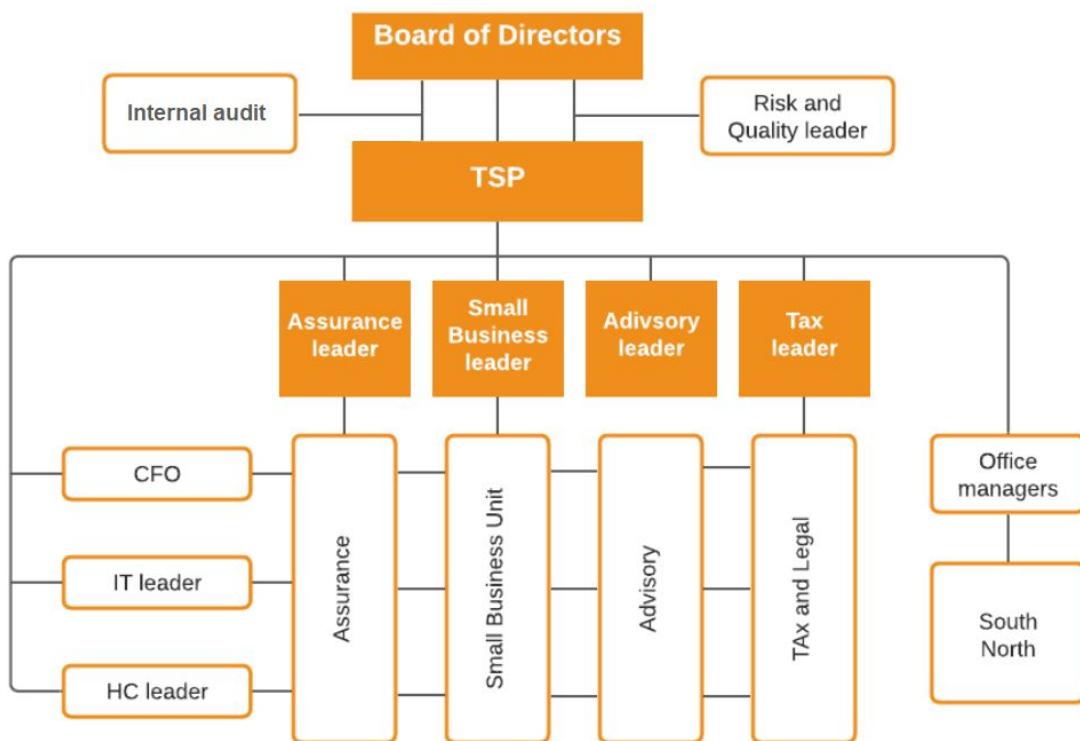

PwC Iceland, is a private limited liability company, 100% owned by a partnership, Eignarhaldsfélagið PwC sf., whose ultimate owners are the Icelandic equity partners.

Our governance structure and culture

PwC Iceland is headed by the Territory Senior Partner (“TSP”) / CEO, who is elected directly by the partners. The Territory Senior Partner is PwC Iceland’s direct reference point of and overall accountable to the PwC Global Network Leadership. The strategic direction of PwC Iceland is decided by the TSP together with the Board of Directors. Execution of the strategy and business plans is the responsibility of the individual equity partners, who pursue their respective management responsibilities for servicing clients and managing staff. All equity partners thus undertake the day-to-day management in relation to the clients and engagements in their individual portfolio.

An important part of creating a strong and unified PwC culture, which is a strategic priority to us, is that we have skilled leaders who motivate employees every day and develop our business. We believe that the leadership makes a difference. That is why PwC’s leadership values are the cornerstone of our corporate culture and support our decisions and actions on our journey towards shared and individual success. It is thus crucial to the development of our business and staff that we cultivate an open and honest dialogue and manage to create active and actual involvement in pursuing the best decisions

Annual general meeting

Our partners exercise their influence by participating in and voting at shareholders' meetings of PwC Iceland in accordance with the partners' agreement entered into by the partners. The partners' agreement regulates the mutual relationship between the partners

Board of Directors

PwC's Board of Directors comprises three members elected by the shareholders. The Board of Directors monitors the work of the TSP and the Management board and is responsible for overall governance of PwC Iceland. One of the responsibilities of the Board of Directors is to determine PwC's overall objectives, strategies, budgets, etc.

The Board of Directors ensures that the management board establishes efficient risk management systems and plans and appoints in that respect the Risk and Quality Leader. The board must also consider whether PwC Iceland's capital resources are adequate for the purpose of its operations.

The Board of Directors is responsible for monitoring that PwC operates in accordance with existing legislation and the commitments arising out of PwC's international agreements. Rules of procedure have been prepared for the Board of Directors; reviewed annually to ensure that they match PwC's development and needs.

“Board of Directors is evaluated on a annual basis”

Territory Senior Partner

In accordance with the standards of the PwC network, the partners of PwC Iceland elect a Territory Senior Partner (TSP). The TSP is the direct reference point of the PwC Global Network Leadership and is overall accountable for PwC Iceland's implementation of the PwC network policies and standards. According to PwC Iceland's articles of association, the TSP serves for a term of three years and is appointed CEO – in continuation of the appointment as TSP. The TSP is eligible for re-election. The TSP decides on the composition and appoints the members of the Management board subject to approval by the Board of Directors.

PwC Management board

The management board is responsible for the overall management of PwC Iceland. It consists of a TSP, and the leaders of the principal Lines of Service; Assurance, Accounting, Tax and Advisory.

Other leaders

In addition to the TSP and the Management board the main responsibility of day-to-day activities lie by the Chief Financial Officer, the Human Capital Leader, Marketing Leader and the Information Technology Leader.

Basis of partners' remuneration

PwC has a remuneration policy for the partners designed to promote long-term behaviour and ensure a balanced relationship between performance and remuneration at a competitive level. The remuneration policy is presented and adopted, annually, by the Board of Directors, after consultation at a partners meeting.

At PwC Iceland, the partner remuneration system has three core elements. The partners are remunerated based on:

- The role they carry in the partnership;
- How well they perform in the role;
- How well PwC Iceland as a whole performs.

PwC's partner remuneration is based on a wish to motivate, recognise and reward our partners for their contribution to the development of our business, both as members of integrated teams and as individuals.

Each year, a comprehensive appraisal process is carried out using PwC's values and strategic priorities as the outset. While a certain element of discretion is exercised when evaluating a partner's performance, PwC's appraisal process also involves an assessment of a partner's target achievement. The process is closely monitored by our leadership to ensure that the individual partners are remunerated fairly and reasonably on a uniform basis; furthermore, the total partner remuneration is subject to approval by the Board of Directors.

“PwC has a remuneration policy for the partners designed to promote long-term behaviour and ensure a balanced relationship between performance and remuneration at a competitive level”
